FIRE SUPPRESSION SYSTEM (CO2/Inert Gas Flooding System)

Carbon dioxide (CO2) flooding systems. A fixed installation designed to displace the oxygen in the protected space and thus extinguish the fire, usually used to fight fires in engine rooms, boiler rooms, pump rooms and hold. The system normally consists of a series of large CO2 cylinders.

SOLAR PANEL SYSTEM

Solar panel is a device that converts sunlight into electricity by using photovoltaic (PV) cells. PV cells are made of materials that produce excited electrons when exposed to light. These electrons flow through a circuit and produce direct current (DC) electricity, which can be used to power various devices or be stored in batteries. Solar panels are also known as **SOLAR CELL PANELS, SOLAR ELECTRIC PANELS, OR PV MODULES.**

CCTV CAMERA

are a dire necessity today and investing in that means protecting yourself from theft and other possible crimes. Bringing it to the hand's reach are the businesses who sell these security cameras to individuals, residential complexes and commercial enterprises. The CCTV Installation Services in Jamshedpur care for you and your family and make available a wide range of models, each armed with an array of beneficial features. High rate optical and digital zoom, alarm out, motion, high-end technology, image sensor, are some of the features that decide the individual price tags for these surveillance cameras. Being aware of the fact that you are being watched over gives a sense of protection and comfort. A Wireless CCTV Camera or High-Definition HD CCTV Camera.

Services & Solution we offer :

FIRE EXTINGUISHER SYSTEM

A fire extinguisher is an active fire protection device used to extinguish or control small fires, often in emergency situations. It is not intended for use on an out-of-control fire.

WATER SPRAY & SPRINKLER SYSTEM

A fire sprinkler system is an active fire protection method, consisting of a water supply system, providing adequate pressure and flow rate to a water distribution piping system, onto which fire sprinklers are connected.

FIRE DETECTION & ALARM SYSTEM:-

A fire alarm system has a number of devices working together to detect and warn people through visual and audio appliances when smoke, fire, carbon monoxide or other emergencies are present.

FIRE HYDRANT SYSTEM

Fire hydrant pump systems (also known as fire pumps, hydrant boosters, fire water pumps) are high pressure water pumps designed to increase the firefighting capacity of a building by boosting the pressure in the hydrant service when mains is not enough, or when tank fed.

PA SYSTEM

a system of microphones, amplifiers and loudspeakers are used to amplify speech or music in a large building or at an outdoor gathering.
